    - In documenting the network and servers in the district, we are hoping to not only provide a centralized location for important data, but also clarify configuration, ease troubleshooting, and identify and correct possibly mis-configured equipment. We are making solid progress in identifying network lines and collecting server and switch information. More information will be sifted through and sorted through the remainder of the school year and the summer.
    - Summer is a great time to work on time- consuming and service- disruptive projects, and the Technology Department has been compiling a list of tasks to perform. One item is the aforementioned documentation project. Some others are: configuring network management software (based on the Simple Network Management Protocol, or SNMP), working on switching our Internet service over to Comcast's business service, researching a possible printer replacement plan, and continuing to locate new vendors and services to enhance the district's use of technology.

## CLEMENTON BOARD OF EDUCATION MEETING MINUTES ~ May 26, 2009

- Finally, we have started to look at rewriting the Technology Plan, which is a requirement for the E-Rate grant program. This is a large document that the state requires each district to submit every three years, and a draft version needs to be in place within a couple of months.
